

2 years hardware warranty. Extend it up to 5 years!

Arteco 5000

High performance with Compact Foot-Print: Arteco 5000.

The system features of the Arteco 5000 make it ideal for managing video surveillance systems equipped with high resolution IP cameras, without sacrificing design and space. Arteco 5000 can handle IP video sources from all major international manufacturers and is compatible with ONVIF™ and RTSP devices. Not just a NVR, SEetheDIFFERENCE, this is a customizable system.

NVR EXPANDABLE UP TO 72 CHANNELS VIDEO IP

Each Arteco 5000 comes pre-loaded and tested with your selection of Camera licenses (sold separately). Choose the version that fits your needs between Pure, eMotion, Active or Extreme, from 1 to 72* camera licenses and we will prepare the ready-to-use NVR. Not sure if you will need to add storage in the future? Arteco 5000 gives you the ability to install up to 4 HDDs, either immediately or at a later time, thanks to disk controllers with full hot swap support.

OPTIONS AND UPGRADES

Integrate your alarm and security systems using the Arteco CONTACT ID module for comprehensive control of your security. Complete your Arteco 5000 with the optional Arteco Everywhere I/O modules for a fully integrated security solution. Experience a system that maximizes your protection while minimizing unnecessary energy costs.

** Number of cameras managed by a video surveillance server varies based on the Resolution of the Cameras used. Arteco 5000 maximum camera recommendation is based off field tests with D1 Resolution cameras.*

Arteco certified hardware to match the software of your choice
